experience

Underbelly : Product Designer 2017 – 2019

Underbelly is a digital design agency based out of SLC. As a Product Designer, my primary client was Facebook. Being a contract designer, I operated as a remote team member, fully integrating with their sprints, engineers, and design teams, solving complex UX problems, and making strategic decisions, to empower video creators to build their own businesses doing what they love.

Teem : UI.UX Designer 2015 – 2017

Teem is a SLC startup, creating conference room management software. At Teem I was the primary UI designer creating custom branded interfaces for their room booking displays. In this role I was able to design branded meeting room displays for companies such as Expedia, Lyft, and IDEO.

software

Sketch
Adobe Creative Suite
Principle

education

University of Utah
BFA with emphasis in Graphic Design
Dean's List all semesters
2014 – 2018
